## Summary

Detail-oriented and driven Full Stack Developer with 2+ years of experience and a strong foundation in core programming principles, structured logical thinking, and problem-solving. Able to quickly learn and adapt to new technologies through solid technical understanding and hands-on experience. Experienced in building end-to-end full-stack web applications using React, Next.js, and Tailwind CSS, delivering responsive, scalable, and high-performance user interfaces. On the backend, proficient in PHP (Laravel), Kotlin (Spring Boot), Node.js, and Vert.x, with hands-on experience in building robust, event-driven, and reactive systems that handle real-time data and asynchronous processing. Experienced in developing CMS-driven platforms, RESTful APIs, dynamic web applications, and scalable backend services using Laravel and modern web technologies.

Strong expertise in database design and data architecture using PostgreSQL and MySQL, along with advanced experience in ClickHouse for high-performance analytics, Redis for caching and real-time data processing, and ArcadeDB for graph and multi-model data management (vertices and edges). Extensive hands-on experience in complex API integrations and external system connectivity, including secure payment and financial integrations with Mastercard and eFawateercom, telecom integrations with Umniah, health and wearable platforms such as Whoop and Fitbit, and WhatsApp API for automated communication systems.

Experienced in handling authentication, secure data exchange, real-time communication, and ensuring reliable and scalable integration between distributed systems. Additionally experienced in mobile application development using Flutter and Native Android (Kotlin). Proven ability to lead technical work, support team members, and deliver end-to-end solutions from design and development to deployment and maintenance, with a strong focus on scalability, performance, code quality, and maintainable software architecture.

## Experience

### Nerdberry – Amman, Jordan

Apr 2026 – Present

#### Full Stack Developer (PHP / Laravel)

- Develop and maintain CMS-driven web applications using PHP and Laravel.
- Build and consume RESTful APIs and integrate frontend applications with backend services.
- Design and implement database structures, relationships, migrations, seeders, and Eloquent models.
- Develop dynamic content management features and admin dashboards.
- Work with Laravel routing, middleware, authentication, validation, and service architecture.
- Collaborate with frontend teams using Next.js, React, and Tailwind CSS for full-stack feature delivery.
- Implement SEO-friendly, scalable, and maintainable solutions for client websites.
- Develop dynamic pages and CMS-managed content systems with reusable architecture.
- Debug, optimize, and enhance application performance and code quality.
- Participate in code reviews, feature planning, testing, deployment, and production support.
- Work with AI-assisted development workflows to accelerate implementation while maintaining engineering standards.

### MZN - Amman, Jordan

Apr 2024 - Apr 2026

#### Full Stack Developer

- Led the development of full-stack web and mobile applications across multiple projects, covering frontend, backend, and mobile layers.
- Built responsive and scalable frontend applications using React.js, Next.js, and Tailwind CSS with focus on performance and user experience.

- Developed backend services using Kotlin (Spring Boot) and Vert.x, implementing RESTful APIs, event-driven architecture, and asynchronous processing.
- Integrated and worked extensively with multiple external and enterprise systems and APIs, including:
  - Mastercard (payment processing and financial transactions integration)
  - eFawateerCom (bill payment and financial services integration)
  - Umniah (telecom services integration)
  - Whoop API (health and fitness wearable data integration)
  - Fitbit API (health tracking and activity data integration)
  - WhatsApp Business API (automated messaging and communication workflows)
- Ensured secure authentication, encrypted data exchange, and reliable real-time communication between distributed systems.
- Designed, implemented, and optimized databases using PostgreSQL, MySQL, and SQL Server.
- Worked with advanced data technologies including ClickHouse for analytics, Redis for caching and real-time processing, and ArcadeDB for graph and multi-model data structures.
- Developed cross-platform mobile applications using Flutter and Native Android (Kotlin).
- Participated in system architecture decisions and contributed to scalable system design.
- Led and mentored team members, performed code reviews, and ensured high-quality delivery of projects.
- Managed the full project lifecycle from planning and development to deployment and maintenance.

**Luminus Technical University College – Amman, Jordan**

May 2023 - Nov 2023

#### **QA Intern - manual & automation**

- Performed manual and automated testing for web and mobile applications.
- Designed, executed, and documented test cases, test scenarios, and bug reports.
- Worked with Selenium WebDriver to develop and maintain automated test scripts.
- Identified, tracked, and verified software defects throughout the testing lifecycle.
- Collaborated closely with developers and stakeholders to ensure software quality and timely issue resolution.
- Participated in regression, functional, and user acceptance testing activities.
- Contributed to improving application reliability, usability, and overall user experience.

#### **Education**

- |                                                                     |                     |
|---------------------------------------------------------------------|---------------------|
| • Yarmouk University Bachelor of Biomedical Informatics Engineering | Sep 2017 – Jan 2022 |
| • Luminus Technical University College QA Internship Program        | May 2023 – Nov 2023 |

#### **Skills**

- **Frontend:** React.js, Next.js, Tailwind CSS
- **Backend:** Kotlin, Spring Boot, Vert.x, Node.js
- **Databases:** MySQL, PostgreSQL, SQL Server
- **Mobile Development:** Flutter, Android Native (Kotlin)
- **Tools & Technologies:** Git, GitHub, REST APIs, ERD Design
- **Testing:** Manual Testing, Selenium WebDriver

#### **Certifications**

- Complete SQL Course
- Selenium WebDriver
- Postman
- Manual Testing

#### **Technical Expertise**

- API Integration & Third-party Services
- Event-driven and Reactive Systems
- Database Design and Data Modeling

- Performance Optimization and Scalability
- Team Leadership and Code Review

### **Additional Technologies**

- ClickHouse (High-performance analytics)
- Redis (Caching and real-time processing)
- ArcadeDB (Graph and multi-model database)

### **Languages**

- Arabic: Native
- English: Very good (reading, writing and speaking)
